Due to its location, the climate in Croatia is divided into two zones - moderately continental and mediterranean. Average temperatures in the summer in Croatia vary between 23 and 26 ° C in the coastal area and between 20 and 22 ° C in the continental part. In winter, average temperatures range between 0 and -2 ° C , in the coastal area between 4 and 6 ° C and in the southern part more than 6 ° C. Although Croatia has been a member of the European Union since 1 July 2013, the Croatian currency is still the Croatian kuna. In most cases, you will be able to pay for your personal costs with a card where payment with card is allowed.

- **Zadar** is a town in northern Dalmatia and the center of Zadar County. It has a population of about 75,000. Due to its position in the middle part of the Adriatic, it is well connected with the rest of Croatia and easily accessible by land, air and sea. The city has a rich 3000 years old history. The city center is located on a peninsula that has been the target of numerous invaders over the centuries, repeatedly destroyed and robbed. Lush history has left many significant monuments that still adorn the city today. One of the most recognizable is certainly the church of St. Donat from the 9th century because of its specific cylindrical shape. Next to the church is the ancient Forum, the largest on the eastern side of the Adriatic. Another important church is the Zadar Cathedral of Sv. Stošije which is also the largest Dalmatian cathedral. Of the modern attractions stand out the Sea Organ and the Greeting to the Sun.
- **National Park Plitvice Lakes** is the most famous and oldest national park in Croatia. In 1949 it was proclaimed the first national park in Croatia, and due to its beauty and particularities of travertine barrier formation, in 1979 it was included on the UNESCO World Heritage List. It is made up of 16 larger and smaller lakes that create magnificent waterfalls known around the world.
- **National Park Krka** covers the area along the Krka River that was declared a national park in 1985. With its 7 travertine waterfalls, is the Krka River a natural and karst phenomenon. The most famous are Skradinski Buk, Roški Waterfall and Manojlovac Waterfall. Beside the waterfalls, in the National Park is also worth visiting the islet of Visovac, which is located on

- **Klis** is a settlement in the hinterland of Split, which was built at the foot of the medieval fortress by which this settlement is famous. Klis Fortress is one of the most prominent forts in Croatia as well as one of the most complete examples of fortification architecture in Croatia. Because of its strategic location, it was often the site of numerous confrontations and a synonym for Croatian impendance during the time of Turks. More recently, the fort is known as the city of Meereen from the series "Game of Thrones".
- **Split** is the largest Dalmatian city known for its rich cultural heritage and monuments, and especially for the Diocletian's Palace that the Emperor built to spend his last days there. The Palace is one of the best preserved monuments of Roman architecture in the world, which, together with the historic center of Split, was included in the UNESCO World Heritage List in 1979.
- **Nin** is a small town near Zadar. Its old town is located on a small island connected to the mainland by two stone bridges. Nin is the oldest Croatian royal city. In Nin is the smallest cathedral in the world, the church of St. Crisis. Nin is also recognizable for its medicinal mud that was used in Roman times, but also for the production of salt, which also dates back to Roman times.
- **Pag** is one of the largest islands in the Adriatic. It is located in the Velebit Channel and is therefore exposed to the frequent blows of a strong bora which is also the main cause of the rocky landscape with mostly low vegetation. Exactly these vegetation, that is rich in aromatic herbs, which is the main food for sheeps, gives a special taste to the world famous Pag cheese and lamb.
